EDUCATION

Brown University, *B.S. Computer Science and Philosophy* Providence, RI | Expected Graduation May 2030
Relevant Course Subjects**:** Object-Oriented Programming | Probability and Statistics with Calculus | Stigma, Prejudice & Solutions

Palisades Charter High School, GPA: 4.00 unweighted | 4.70 weighted Los Angeles, CA | Class of 2026

WORK EXPERIENCE

Full Stack at Brown, *Web Developer* Providence, RI | September 2026 - Present
- Developed a custom website for Brown Technology Consulting Group as part of a cross-functional project team serving campus and community organizations
- Created front-end and back-end features using React, JavaScript, HTML, and CSS, translating design specifications and client requirements into functional web experiences
- Collaborated throughout the full-stack development cycle to integrate features, incorporate client feedback, and deliver a production-ready website

Placivic, *Associate* Los Angeles, CA | June 2026 - August 2026
- Designed and built Placivic's website, translating the company's core values and unique approach to strategic consulting for mission-driven organizations into a clear, cohesive online presence
- Engineered a full-stack contact form using Netlify serverless functions and the Resend API, integrating automated email delivery, server-side validation, spam protection, and secure API key management
- Wrote client-facing service briefs translating Placivic's mission and strategic approach into specific offerings, including implementation roadmaps, sustainability audits, grant program design, and strategic partnerships

Slalom Consulting & LAPD, *Technology Strategy & Solutions Developer* Los Angeles, CA | January 2026 - May 2026
- Earned the Impact Award (1st place) for top-ranked solution among competing teams in the Slalom Consulting & LAPD Youth Innovation Quest
- Designed an AI-powered decision-support system for police response in Los Angeles, integrating real-time bodycam analysis, historical call data, and risk detection across mobile and patrol-vehicle interfaces
- Conducted interviews with law enforcement officers to validate the problem and refine solution design, then built a functional demo with UI mockups and system architecture simulating real-time situational awareness and AI-assisted reporting

Stable Dynamics Inc., *Software Development & Support Intern* Los Angeles, CA | June 2025 - August 2025
- Educated users on the features and technical capabilities of the Rain Rain app (over 8 million downloads), enhancing user experience and reducing service requests
- Developed a prototype for a wellness app that introduces custom fitness challenges for users and tracks progress; presented the concept for internal testing

Loyola Marymount University, *Research Assistant* Los Angeles, CA | June 2025 - August 2025
- Conducted comparative research on Eastern and Western deities for *Wrathful Goddesses* by Prof. Tracy Tiemeier
- Utilized JSTOR and academic journals to support research projects and future publications; independently identified, organized, annotated, and created an official bibliography of cited sources

PROJECT EXPERIENCE

Syllabuddy, *Creator/Developer* Providence, RI | June 2026 - Present
- Developed a full-stack learning platform that transforms course lectures, slides, and notes into interactive practice exercises and a course-specific RAG chatbot that provides source-cited answers (JavaScript, Node.js, PostgreSQL, Claude API)
- Wrote a lecture-processing engine in Node.js that turns a transcript into a summary, key terms, flashcards, quiz questions, and a day-by-day study plan timed to the exam date
- Created a 20-case test suite for the chatbot, including off-topic and trick prompts, and selected the model passing every case at 1/14 the cost of larger models; built a 30+ endpoint REST API with 82 automated tests
