EDUCATION

Brown University, *B.S. Computer Science and Philosophy* Providence, RI | Expected Graduation May 2030
Relevant Coursework: Object-Oriented Programming | Probability and Statistics with Calculus

Palisades Charter High School | GPA: 4.00 unweighted / 4.70 weighted | SAT: 1530 Los Angeles, CA | Class of 2026

PROJECT EXPERIENCE

Syllabuddy, *Creator/Developer* Providence, RI | June 2026 - Present

- Developed a full-stack learning platform that transforms course lectures, slides, and notes into interactive educational tools and a course-specific RAG chatbot that provides source-cited answers (JavaScript, Node.js, PostgreSQL, Claude API); pitched the product to investors with a fully functional demo and go-to-market plan including an adoption strategy
- Built a lecture-processing engine in Node.js that turns transcripts into summaries, key terms, flashcards, practice exercises, quiz questions, and day-by-day study plans timed to exam dates
- Engineered 30+ REST endpoints with role-based access controls and course-level authorization, backed by automated tests covering permissions, document processing, and study workflows
- Designed a 20-case evaluation suite to test chatbot accuracy and reliability, identifying an AI model that passed every test at 1/14 the cost of larger alternatives

Rizdum, *Creator/Developer* Providence, RI | June 2026 - Present

- Developed a gamified matchmaking platform where users team up with a friend to meet other duos through live 2v2 video conversations, earning XP and climbing leaderboards through interactive challenges (Next.js, TypeScript, LiveKit)
- Engineered a Supabase/PostgreSQL matching backend supporting 1v1 and 2v2 queues, party invite codes, and database locking to prevent duplicate matches from concurrent requests
- Synchronized checkpoint voting and in-call messaging across browsers using LiveKit data messages, with server-aligned timers maintaining consistent game state between participants

Slalom Consulting & LAPD Youth Innovation Quest, *Systems Design Leader* Los Angeles, CA | January 2026 - May 2026

- Earned the Impact Award (1st place) for developing the top-ranked solution to address police emergency-response challenges in Los Angeles
- Interviewed LAPD officers to identify operational challenges and designed an AI-powered decision-support concept integrating real-time bodycam analysis, historical call data, and risk detection
- Developed a functional demo with interface mockups and system architecture illustrating how the proposed system could improve situational awareness and AI-assisted reporting

WORK EXPERIENCE

Full Stack at Brown, *Web Developer* Providence, RI | September 2026 - Present

- Developed a custom website for Brown Technology Consulting Group as part of a cross-functional project team serving campus and community organizations, incorporating client feedback throughout the full-stack development cycle
- Created and integrated front-end and back-end features using React, JavaScript, HTML, and CSS, translating design specifications and client requirements into a production-ready website

Placivic, *Associate (Web Development)* Los Angeles, CA | June 2026 - August 2026

- Designed and built Placivic's website, translating the company's core values and unique approach to strategic consulting for mission-driven organizations into a clear, cohesive online presence
- Engineered a full-stack contact form using Netlify serverless functions and the Resend API, integrating automated email delivery, server-side validation, spam protection, and secure API key management

Stable Dynamics Inc., *Software Development & Support Intern* Los Angeles, CA | June 2025 - August 2025

- Managed customer education and inquiries about features and functionality of the Rain Rain app (over 8 million downloads), enhancing user experience and reducing service requests
- Developed a prototype for a wellness app that introduces custom fitness challenges for users and tracks progress; presented the concept for internal testing

SKILLS & INTERESTS

Languages: Java, Python, C++, TypeScript, JavaScript, SQL, HTML, CSS
Frameworks & Tools: React, Next.js, Node.js, PostgreSQL, Supabase, LiveKit, REST APIs, Git/GitHub, Linux, Netlify
Leadership & Interests: Cross-country/track team captain; Five-time CA State team finalist; Jiu-Jitsu; Guitar; Chess
Service & Honors: Union Rescue Mission & Grass Roots Neighbors (homeless outreach); Hispanic Scholarship Fund Scholar
